Hey Enrique and John,

I have attached a draft document describing criteria for time critical removal actions that DTSC put together for potential use at the Exide site. I had spoken to Enrique about potentially grabbing some of Region 9's time to talk through this approach.

The basic approach will, of course, look familiar to you, though it contains modifications based on standards and other information taken from state and federal sources.

I've cc'd Zoe and Tamara on this message so that we can more easily coordinate on scheduling a follow-up discussion when y'all might have time.

Hope that your respective weeks are going well.

Thanks much,

Grant
